Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Arthropoda	Insecta	Orthoptera	Tetrigidae

Taxon Name: *Tettigidea trinitatis* Bruner, 1906

Common Name(s):

- English: Trinidad Pygmy Grasshopper

Taxonomic Source(s):

Cigliano, M.M., Braun, H., Eades, D.C. and Otte, D. 2016. Orthoptera Species File. Version 5.0/5.0. Available at: <http://Orthoptera.SpeciesFile.org>.

Assessment Information

Red List Category & Criteria: Data Deficient [ver 3.1](#)

Year Published: 2019

Date Assessed: February 8, 2018

Justification:

The Trinidad Pygmy Grasshopper (*Tettigidea trinitatis*) has originally been described from Trinidad. A later record from Cuba is doubtful. The type material of this species needs to be studied to clarify the taxonomic status of this species. Due to the lack of information regarding its validity as well as distribution, ecology and threats, it is classified as Data Deficient.

Geographic Range

Range Description:

The Trinidad Pygmy Grasshopper has originally been described from Trinidad (Bruner 1906). A later record from Cuba (Steinmann 1969) is doubtful.

Country Occurrence:

Native: Trinidad and Tobago

Distribution Map

Tettigidea trinitatis

Range

Extant (resident)

Compiled by:

SSC Grasshopper Specialist Group

Population

No information on the population size or trend is available.

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)

The habitat of this species has not been documented.

Systems: Terrestrial

Use and Trade

The species is not utilized.

Threats

The threats to this species are unknown.

Conservation Actions (see Appendix for additional information)

No specific conservation action is in place for this species. The type material needs to be studied to clarify the taxonomic status of this species.

Appendix

Habitats

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Habitat	Season	Suitability	Major Importance?
0. Root -> 18. Unknown	Resident	Unknown	-

Conservation Actions in Place

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Conservation Actions in Place
In-Place Research, Monitoring and Planning
Action Recovery plan: No
Systematic monitoring scheme: No
In-Place Land/Water Protection and Management
Occur in at least one PA: Unknown
Area based regional management plan: Unknown
Invasive species control or prevention: Unknown
In-Place Species Management
Harvest management plan: No
Successfully reintroduced or introduced benignly: No
Subject to ex-situ conservation: No
In-Place Education
Subject to recent education and awareness programmes: No
Included in international legislation: No
Subject to any international management/trade controls: No

Research Needed

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Research Needed
1. Research -> 1.1. Taxonomy

Additional Data Fields

Population
Continuing decline of mature individuals: Unknown
Extreme fluctuations: Unknown
Population severely fragmented: Unknown
Habitats and Ecology
Continuing decline in area, extent and/or quality of habitat: Unknown
Movement patterns: Not a Migrant
